Young persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now, who that understands the subject will pretend to deny that the procession is lost sconer by those falling into improper habits than by the pradent? Besides being deprived of the pleasure of healthy offspring, the most serious destructive symptoms of both body and mind arise. DR. SAGE'S CATARRH REMEDY.

It is the only form of instrument yet invented with which finid medicine can be carried high symmic strong or strong or services communicating therewith, in which sores and ulcers frequently exist, and from which the catarrhal discharge generally proceeds. The want of success in treating catarrh herefolore has arisen largely from the impossibility of applying remedies to those cavities and chambers by any of the ordinary methods. This obstacle in the way of effecting cures is entirely overcome by the invention of the Denche. In using this instrument, the Fluid is carried by its own weight for southing forcing or pumping being required.
